RigiSystems PVDF

Weathered Range

Copper

Zinc

Actual colours may vary due to the limitations of the four colour printing process.

These swatches are indicative of colour only and specifiers should obtain material samples before ordering where shade is critical. Please check in advance for details of pricing of these colours. A minimum quantity for each colour may be required due to restrictions on paint availability.

Metallic coatings are directional. To avoid contrast it is important to ensure all sheets are fixed in the same (machine) direction and not inverted. Each elevation should be clad with material from the same batch.

Other colours are available subject to order quantity. Please contact the Sales Department for further information.
